

# THE UNITED STATES IN ANTARCTICA

Report of the  
U.S. Antarctic Program  
External Panel

---

Cover: “Cathedral Berg At Night,” ©1994 by Neelon Crawford.

This photograph of a heavily eroded iceberg was made on the evening of June 23, 1994. R/V *Polar Duke*, from which the picture was taken, was about 60 miles south of the Antarctic Circle, in the Bellingshausen Sea at 67°26'77.6" S. 70°05'39.9" W. The highest points of the berg tower more than 100 feet above the waterline and the length of the visible portion of the berg is on the order of 400 feet. The berg presumably calved off one of many glaciers on the Antarctic Peninsula, but in fact could have traveled a far greater distance to this location. Some of the berg's ice may have been formed hundreds of thousands or even millions of years earlier.

**United States Antarctic Program External Panel**  
Washington, D. C.

April 1997

This document represents the final report of the United States Antarctic Program External Panel. The report has the unanimous approval of all 11 panel members and draws upon our collective experience which includes some 44 individual trips to Antarctica involving visits to all three U. S. stations, each research ship, support icebreakers and numerous field sites. As a panel, we visited McMurdo Station and South Pole Station and toured support facilities at Christchurch. We received approximately 70 briefings and conducted 80 "one-on-one" meetings with individuals involved in virtually all aspects of the Antarctic Program. Over 200 inputs were received in response to our request for "public comments."

During visits to McMurdo and the Pole, the Panel conducted informal "Town Meetings" and was the beneficiary of numerous comments by members of those communities having first-hand experience in day-to-day operations. We are most appreciative of the candor and professionalism with which we were treated by all those with whom we came into contact, and in particular the members of the National Science Foundation who so expertly and constructively supported our efforts.

We believe the U. S. Antarctic Program is well managed, involves high quality science and is important to the region as well as to the United States. We also believe that in the current budget environment, costs must be reduced, preferably through increased efficiency and "reinvention," but, if not, through reduced scope. Recommendations are offered herein to help ensure the continued viability of the program into the 21st century.

## Exhibits

1. Federal spending for polar research in FY96 ...	5
2. Cutaway view of the Antarctic ice sheet and bedrock .....	9
3. Map comparing sizes of Antarctica and the United States .....	9
4. Antarctic annual temperatures at three locations .....	10
5. How Antarctic ice affects world climate .....	11
6. The life cycle of the emperor penguin .....	12
7. "Antarctic Meltdown" (effect of melting ice sheet) .....	14-15
8. South Pole/North Pole map and comparison table .....	16
9. Cruise tracks of Captain Cook and other early explorers .....	18
10. Attainment of the South Pole (Amundsen and Scott) .....	19
11. Comparison of impact of whaling and ozone hole .....	20
12. Gondwana (maps of former supercontinent) ...	20
13. Map of Antarctic stations (all nations) .....	22
14. Number of Antarctic Treaty nations, 1959-1997 ...	23
15. U. S. Antarctic Program spending history, 1955-1997 .....	24
16. USAP FY95 funding for support and science by facility .....	25
17. USAP FY95 science grants to research institutions .....	25
18. McMurdo Station .....	25
19. McMurdo Station annual population cycle, June 1994 - May 1997 .....	26
20. Amundsen-Scott South Pole Station .....	26
21. Palmer Station .....	27
22. R/V <i>Polar Duke</i> (ice-strengthened research ship)	27
23. R/V <i>Nathaniel B. Palmer</i> (research icebreaker)	28
24. USCGC <i>Polar Sea</i> (logistics icebreaker) .....	28
25. <i>Green Wave</i> (cargo ship) .....	28
26. LC-130 Hercules .....	29
27. Twin Otter research/support airplane .....	29
28. Contract helicopter being unloaded from C-5 .....	29
29. Automated geophysical observatory .....	30
30. Field camp .....	31
31. International cooperation (Cape Roberts project) .....	31
32. Number of projects and research personnel compared to budget .....	33
33. USARP and operational support budgets, FY85-FY97 .....	34
34. USAP dollars per research personnel .....	34
35. USAP dollars per research project .....	34
36. U.S. Government Executive Branch policy statements regarding Antarctica .....	37
37. The ozone hole (stratospheric depletion vs time)	38
38. The ozone hole (vertical profile from South Pole Station) .....	39
39. The ozone hole (satellite image of Antarctica) ....	39
40. The ozone hole (satellite image of southern hemisphere) .....	39
41. Antarctic Muon and Neutrino Detector Array (AMANDA) at South Pole .....	40
42. West Antarctic Ice Stream (WAIS) project and <i>Glacier</i> educational project .....	41
43. Southern ocean cross section .....	42
44. Sea ice extent, summer minimum .....	42
45. Sea ice extent, winter maximum .....	42
46. Flux of carbon dioxide: southern ocean JGOFS experiment .....	43
47. Organisms living in Dry Valleys rock .....	44
48. Cyanobacteria in saline Dry Valleys lake .....	44
49. Algal bloom on under surface of sea ice .....	44
50. McMurdo bulk fuel tanks .....	48
51. Snow drift at South Pole (two photographs) ..	49
52. Elevated structures at South Pole Station .....	50
53. South Pole water well .....	50
54. Jamesways at South Pole Station .....	51
55. South Pole Station garage .....	51
56. Nine 25,000-gallon rubber fuel bladders, South Pole .....	52
57. Existing South Pole station (1989 photograph) ...	52
58. Useful life projections, existing South Pole Station .....	53
59. Utilidor (utilities tunnel) at South Pole Station ...	53
60. Enhanced Station at South Pole (artist's conception) .....	54
61. Capabilities, three South Pole Station options ....	54
62. Design parameters, three South Pole Station options .....	55
63. Optimized Station at South Pole (artist's conception) .....	55
64. Reductions from Enhanced to Optimized Station .....	56
65. Costs through 2002 and 2025, four South Pole Station options .....	56
66. Assumed USAP "level" budget, FY98-FY02 ....	57
67. Funding schedule, South Pole Optimized Station, FY98-FY02 .....	57
68. Cost of McMurdo and Palmer improvements, total and FY98-FY02 .....	58
69. USAP science grants and science support costs, FY98-FY02 .....	58
70. USAP level cost five-year budget assessment ....	58
71. USAP funding shortfall, FY98-FY02 .....	59
72. Mobile runway support facility, McMurdo ....	60
73. Reverse osmosis water production at McMurdo ...	61
74. Vintage heavy vehicle at McMurdo .....	63
75. Communication with the South Pole .....	65
76. Number of tourists visiting Antarctica since 1980 ..	67
