NOTES: Data in this table refer to research doctorates only and differ from doctoral degree data in other tables and figures in this report that are based on the NCES Completions Survey. Greatest differences are in psychology. Respondents are asked if they have a disability and then are asked to mark one or more types of disability (blind/visually impaired, deaf/hard of hearing, physical/orthopedic disability, learning/cognitive disability, vocal/speech disability, or other disability). Institutions with the same number of doctorate recipients are listed alphabetically.
