

Randy J. Nelson is Professor and Chair of the Department of Neuroscience at The Ohio State University Medical Center. He holds the Dr. John D. and E. Olive Brumbaugh Chair in Brain Research and Teaching. Nelson also holds joint appointments as Professor of Psychology and Evolution, Ecology and Organismal Biology. He directs the OSU Behavioral Phenotyping Core. Nelson earned his AB degree in Psychology at the University of California at Berkeley; he stayed at Berkeley for his graduate studies and earned a PhD in Psychology in 1983, as well as a second PhD in Endocrinology in 1984. Dr. Nelson then completed a postdoctoral fellowship in reproductive physiology at the University of Texas, Austin from 1984-1986. Nelson served on the faculty at Johns Hopkins from 1986-2000 when he moved to Ohio State. He has published nearly 400 scientific articles and several books describing studies in biological rhythms, behavioral endocrinology, stress, immune function, and aggressive behavior. He has been elected to fellow status in several scientific associations including the American Association for the Advancement of Science, American Psychological Association, Association for Psychological Science, and the Animal Behavior Society. Nelson has served on many federal grant panels and currently serves on the editorial boards of six scientific journals, as well as serves as the associate editor for *Hormones and Behavior* and *Journal of Experimental Zoology A*. He was awarded the Distinguished Scholar Award at Ohio State in 2006, as well as the University Distinguished Lecturer, and the OSU Alumni Award for Distinguished Teaching in 2009. In 2012, he was appointed as Distinguished Professor of the College of Medicine, and in 2013 the Board of Trustees conferred upon him the title of Distinguished University Professor.
