

SCMB Hosts Third Annual Symposium

3rd Annual Symposium
December 7 – 10, 2020

The [Southeast Center for Mathematics and Biology \(SCMB\)](#) will host its [3rd Annual Symposium](#) as a free online event from December 7-10, from 12:00pm-2:00pm (EST). The Symposium will explore the theme of *Interactional Expertise*—an idea behind many successful cross-disciplinary collaborations. The event will feature panel discussions with math-bio researchers and explore the successes and the pitfalls of collaborating across disciplines. Junior speakers from all four NSF-Simons MathBioSys research centers will contribute talks demonstrating the innovative work being done at the math-bio interface. The Symposium will conclude with a plenary talk from Heather Harrington (Oxford) on *Algebraic Systems Biology* and a poster session. For more information and to register for the event, visit scmb.gatech.edu/symposium.

SCMB is one of four [NSF-Simons Research Centers for Mathematics of Complex Biological Systems \(MathBioSys\)](#). The other three are the [Center for Mathematical and Statistical Analysis of Biology](#) at Harvard University, the [Center for Multiscale Cell Fate Research](#) at the University of California, Irvine, and the [Center for Quantitative Biology](#) at Northwestern University.
