

DMS Virtual Office Hours

The Division of Mathematical Sciences (DMS) is hosting virtual office hours (VOH) to share information about NSF's current operations and provide guidance to the mathematical sciences community. The VOH will also allow the community to ask questions, share concerns, or offer suggestions. All members of the mathematical sciences research community interested in the work of DMS are welcome to attend.

Events are planned at roughly monthly intervals, and the topics vary for each event. The virtual office hours are in the form of a Zoom webinar, starting with a brief presentation of a few selected current topics, with DMS program directors available to answer questions from the community.

Upcoming Virtual Office Hours

October 13, 2021 Featured Topics

- **DMS Computational Mathematics** program
- **Smart Health** and Biomedical Research in the Era of Artificial Intelligence and Advanced Data Science (SCH)
- **Collaborative Research in Computational Neuroscience** (CRCNS) program
- **Ecology and Evolution of Infectious Diseases** (EEID) program
- NSF-Simons Collaboration on a **National Institute for Theory and Mathematics in Biology** (NITMB) program
- Tips for Reviewers

Future virtual office hours sessions will be posted on the [DMS events page](#). Presentation materials from previous sessions are available [here](#).

NSF funding opportunities of interest to the mathematical sciences community are shown on the [DMS Programs page](#).
