

## National Science Board Science and Engineering Indicators

# **NEW YORK**

According to the latest data released by the National Science Board in its <u>2020 Science and</u> <u>Engineering Indicators</u> report, the United States leads in a number of science and engineering (S&E) measures. For example, the U.S. invests the most in research and development, attracts the most venture capital, awards the most doctoral degrees, and provides the most business, financial, and information services.

A state's S&E performance helps fuel its and the nation's economy. Four benchmarks of New York's S&E performance are highlighted here: the cost of public higher education, the size of the STEM workforce, investment in research and development, and venture capital funding.

### **Rising Cost of a Bachelor's Degree**

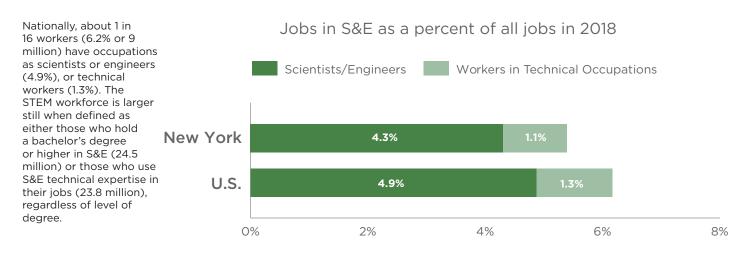

A bachelor's degree is one of several entry points to higher paying jobs associated with science, engineering, and many technical occupations.

Nationally, 34% of the total U.S. workforce has a bachelor's degree or higher. In contrast, 76% of workers in S&E occupations have a bachelor's degree or higher.

#### **Real Change in Research & Development Performed**

Research and development (R&D) spending is a driver of innovation. Investing in science and technology today has ripple-effect benefits throughout the economy over the long term.

Annual state performance in R&D varies considerably, from \$289 million (SD) to \$135.1 billion (CA). New York is one of 9 states that performs between \$15 to \$30 billion per year in R&D. In this figure, New York's percent change in R&D spending is compared to the two highest and the two lowest states within this group.

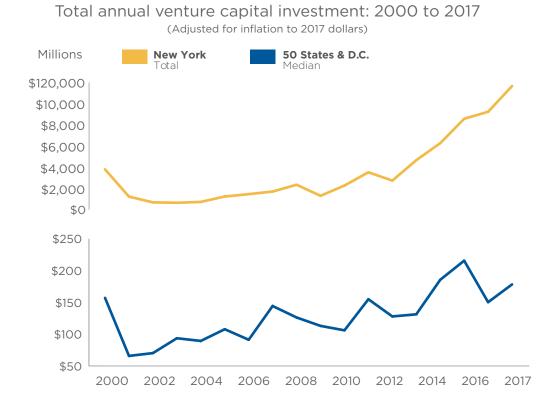

Percent change in R&D spending: 2000 to 2016

#### **Venture Capital Investment**

Venture capital investment supports U.S. businesses that take on the risk of developing and commercializing cuttingedge, emerging technologies. States with high values are successful at attracting venture capital to fuel new kinds of business, and ultimately, expand economic growth.

Total 2017 Venture<br/>Capital InvestmentNY\$11.9BU.S.\$80.6B
