

Dr. Carrie Seltzer

AAAS Fellow

Directorate for Geosciences

Class of 2016-2017

Carrie Seltzer is joining NSF's Geosciences Directorate as a 2016-2017 AAAS Science & Technology Policy Fellow to contribute to NSF international engagements including multilateral collaborations such as the Belmont Forum. She received her Ph.D. in Ecology & Evolution from the University of Illinois at Chicago in 2013 where her research focus was plant-animal interactions, especially in Tanzanian rainforest. As a graduate student, she was supported by NSF's Graduate Research Fellowship Program and an Integrative Graduate Education and Research Traineeship. After completing her Ph.D., she was a postdoc at the University of Maryland College Park and then worked at the National Geographic Society as a program manager for citizen science programs such as BioBlitz for 2 years. Her interests include public participation in science, open data, and science communication.
