

Dr. Laura Skipper-Kallal

AAAS Fellow

Division of Information and Intelligent Systems

Directorate for Computer and Information Science and Engineering

Class of 2016-2017

Laura Skipper-Kallal is a 2016-2017 AAAS Science & Technology Policy Fellow in the Division of Information and Intelligent Systems. In her research, she has applied functional and anatomical neuroimaging, noninvasive brain stimulation, and advanced stroke-lesion analyses as part of a multimodal approach to studying language in the human brain. She received her Ph.D. in cognitive psychology, with a specialization in neuroscience, from Temple University, and then worked as a post-doctoral research in the department of neurology at Georgetown University Medical Center. Her current interests include the role of computer science and computational modelling in advancing the fundamental understanding of neuroscience as it relates to cognitive function.
