

**Dr. Eric Keys**

AAAS Fellow

Directorate for Engineering

Division of Industrial Innovation & Partnerships

***Class of 2015-16***

Eric Keys is an Environmental Geographer with backgrounds in natural resource conservation and economic development, global environmental change, and cultural and political ecology. During his career Eric has carried out research on commercial agriculture and tropical deforestation, wildlife friendly development policies, land use and land cover change, and field methods and techniques. After earning his Ph.D. at Clark University Dr. Keys served at a post-doctoral fellow at CIPEC and as a faculty member at Arizona State University and the University of Florida. Recently Dr. Keys served as the Sustainability Coordinator at the Worcester Polytechnic Institute. He is interested in action-oriented science and policy and science communication. In his free time Eric enjoys traveling and sports as both spectator and participant.
