

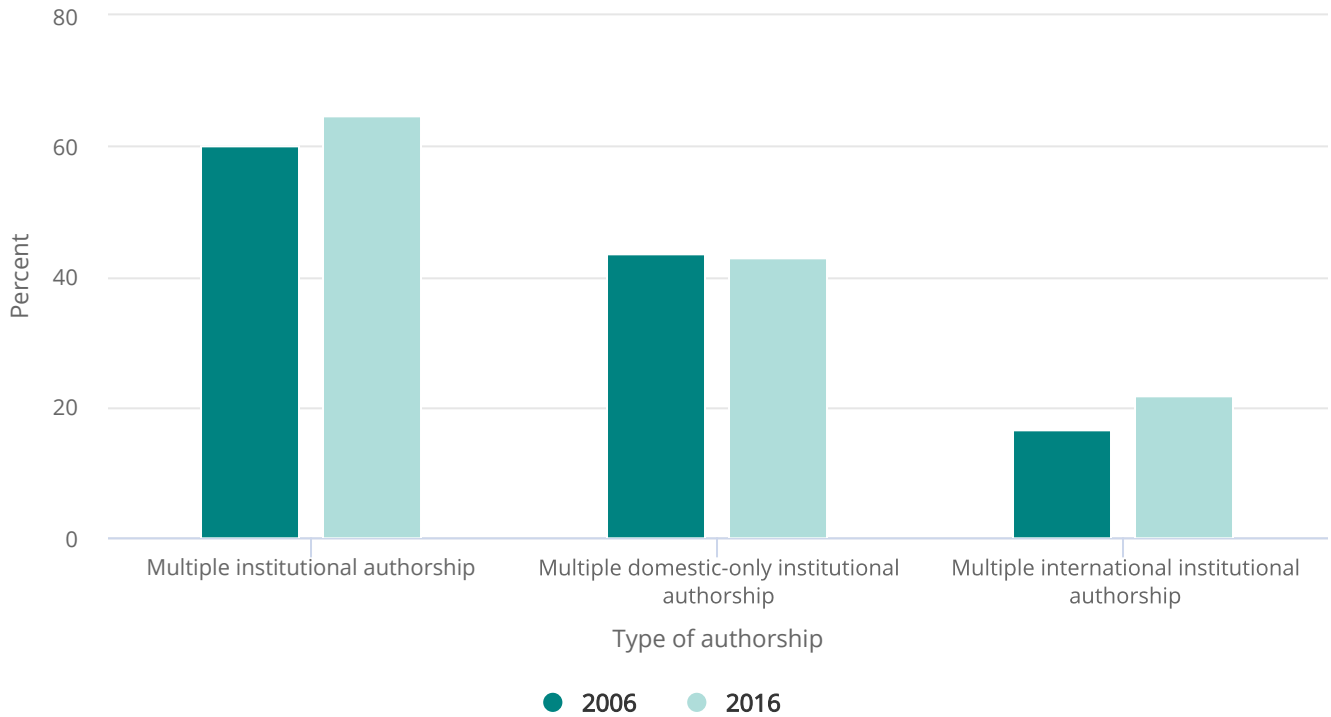

FIGURE 5-24

Share of world articles in all fields with authors from multiple institutions, domestic-only institutions, and international coauthorship: 2006 and 2016

Note(s)

Article counts refer to publications from a selection of journals, books, and conference proceedings in S&E from Scopus. Articles are classified by their year of publication and are assigned to a region, country, or economy on the basis of the institutional address(es) listed in the article. Articles are credited on a whole-count basis (i.e., each collaborating region, country, or economy is credited with one count). Articles with multiple institutions are counts of articles with two or more institutional addresses. Articles with multiple domestic institutions only are counts of articles with more than one institutional address within a single region, country, or economy. Articles with international institutions are counts of articles with institutional addresses from more than one country or economy. See Appendix Table 5-42.
