Other locations outside of the 50 U.S. states and DC	441	16,510
Undistributed ^a	1,162	3,186

^a Includes R&D reported on Form RD-1 that was not allocated to specific locations outside of the 50 U.S. states and DC. Also includes total R&D performed in locations outside of the 50 U.S. states and DC reported on Form RD-1A, because Form RD-1A does not collect data by location.

NOTES: Detail does not add to total for number of companies because categories are not mutually exclusive. Detail does not add to total for money amounts due to rounding or suppression. Data are reported in U.S. dollars. The method used to assign industry classifications has changed; industry-specific estimates are not directly comparable with those for years prior to 2004. The R&D in this table is the industrial R&D performed outside the 50 U.S. states and DC funded from all sources except the federal government. The funds predominantly are the company's own, but also include funds from outside organizations such as other companies, research institutions, universities and colleges, nonprofit organizations, and state governments. Excludes R&D performed outside of the company (e.g., R&D performed by other organizations) and R&D performed outside of the 50 U.S. states and DC (e.g., R&D not performed on U.S. soil by foreign subsidiaries or other foreign organizations). For definitions and more information about year-to-year comparability of the statistics, see technical notes and survey methodology.
